

# YachtComputing Model

Yacht Based IT Services

Land Based IT Services

## YACHT SERVER FEATURES

- **Email Store and Forward**, Collect ship's mail throughout the day and then send and receive on automatic or manual schedules to control communications costs.
- **Easy Email Access**, through conventional Email clients (Outlook etc) or through a web browser so crew/guests can share PC's without losing security and privacy
- **Email Metering**, to limit email sizes to control costs
- **WEB Access**, allows authorised users to browse from anywhere in the network.
- **Ship-Web Server**, for Publishing Ship's information, procedure and policies for Crew and Guests
- **Office Automation**, support for conventional applications as well as Ship management applications.
- **Integration**, Ship Monitoring Navigation and AV System Integration
- **Fault Tolerance** for reliability
- **Simplicity of Design** to minimize maintenance

## LAND SERVER FEATURES

- **Personalized Email Hosting**, (yourname@myship.com)
- **Email Virus Scanning**, before transfer to ship.
- **Email Content Filtering** to limit Spam
- **Email Warehousing**, collecting owner, crew and guest mail for distribution to the ship.
- **Web Browser Access**, allowing world wide Email access from Home, Office, and Cyber cafés
- **Web Hosting Services**, promote your charter business, show your boat in the best light.
- **Full Maintenance** by Yachtcomputing.com staff, you do not need to be a systems professional. We do it for you.
